Specimen sold in A.N.A., 1952, convention sale, item 2416. Sold for \$300.00. [ex-Newcomer, and other colls.]

"Fine to V.Fine with slight planchet granulation. Somewhat weakly struck in the center of the reverse, but a splendid lustrous, steel colored specimen struck upon a wide, full flan. Only five or six impressions are known of this crudely struck Pattern, of which this is one of the finest. It is superior to the Parmelee and Mougey pieces; almost the equal of the G. Clapp, A.N.S. example and inferior, as all are, to the superb coin in the collection of Eric Newman. We have never seen the Ellsworth, Garrett specimen, now in the Johns Hopkins University Collection, which may well be either the Parmelee or Mougey examples. Excessively rare, one of the greatest and most desirable colonial rarities."
